SUN FIBRES

FRP SOLUTIONS

“Where there is decline application, Spiral Chute is definitely the best solution”

About Our Product

A spiral gravity chute is a decline-sloped channel for conveying items or materials from a higher level to a lower level.

Sun Fibres FRP chutes are constructed using a combination of fiberglass and resin and hence provide exceptional strength, durability, and corrosion resistance. Our state-of-the-art Spiral Chutes are an ideal choice for a variety of E-commerce and industrial applications.

We supply chutes from 3m to 15m in height. The height and input/output positions can be calibrated as per customer requirements.
